

Pedro Netto

Stockholm, Sweden

Brazilian & Icelandic citizen

pedro@pnetto.com | +46 736 453 160 | pnetto.com

Software Engineer with 10+ years of experience, focused on Agentic AI (e.g. Vertex AI), with a data engineering flair (e.g. Airflow, Kafka, Spark). Currently at Capgemini Sweden/Telia.

Strong Python foundation paired with hands-on experience building LLM-based systems, event-driven architecture and data pipeline design.

Track record in leading delivery at scale and setting engineering standards (e.g. as lead dev at Icelandair), and coordinating cross-team initiatives from problem framing to production (e.g. as founder at Brisa).

Tech Stacks

Languages – Python (Django, FastAPI, Pandas), SQL, TypeScript, Node.js, Shell

AI – Agentic Frameworks (e.g. ADK, LangGraph), Vertex AI, RAG-enabled assistants, MCP integrations, embeddings/vector search (pgvector), guardrails & data privacy

Data Engineering (familiar) – Airflow, Snowflake, dbt, Kafka, PySpark, Databricks, ETL/ELT, dimensional modeling

Databases – SQL/NoSQL/Object (e.g. Postgres/pgvector, MongoDB, Firestore, Redis)

Cloud – GCP (Cloud Run, GKE, Pub/Sub, Eventarc, IAM), AWS & Azure fundamentals

Infrastructure – Linux fluency, Docker, Kubernetes (GKE), CI/CD (GitHub Actions)

Backend – API design, Event-driven/microservices architecture

Frontend – NextJS/React, Static Site generation, performance & SEO optimization

Engineering Practices – Code & UX review, technical documentation, Agile/Scrum

Experience [\(More\)](#)

Capgemini Sweden/Telia – Agentic AI Engineer (internship)

Dec 2025 – Present · Stockholm

- Developed RAG-powered chat assistants using agent orchestration, integrating MCP servers, handling evaluation and safety considerations
- Delivered observability solutions using Langfuse and GCP Cloud Logging
- Built tools for evaluation dataset synthesis (web scraping + LLM processing)
- Completed GCP Professional Cloud Developer study path and Vertex AI / ADK / RAG training
- Modeled “agentic engineering” prototype to automate data pipeline creation

Icelandair – Lead Frontend Developer

2022 – 2024 · Copenhagen

- Led a team of 4 delivering a new high-traffic airline portal

- Built CMS tools that gave the content team publishing independence, removing an engineering bottleneck
- Advocated for the adoption of a cross-team design style guide
- Created onboarding documentation that reduced ramp-up time for new developers

Kolibri – Full-Stack Engineer

2021 – 2022 · Reykjavík

- Built listasafn.is (National Gallery of Iceland) on Next.js, including a custom search integration involving external teams
- Regularly led client-facing meetings to align on project goals

Tækniskólinn – Program Developer & Instructor

2018 – 2021 · Reykjavík

- Redesigned the Web Development curriculum: 40 modules, 3 cohorts, ~75% job placement rate
- Built a peer assessment system (Next.js, Node.js, MongoDB)

Conbeo – Co-founder · 2018–2020 · Vietnam

- Built a tourism marketplace from ground-up. We had 2 investors, 50 partner agencies, 300+ tours. Developed using AWS, Angular, Gatsby, headless WordPress, AWS, Custom Java Backend API.

Brisa – Founder · 2014–2018 · Reykjavík

- Web studio founder, 4 years long experience, 15+ clients including Iceland's Ministry of Education. Coordinating cross-team initiatives from problem framing to production while managing 10 associates across projects during the period.

Education

- GCP Professional Cloud Developer – study path completed (2026)
- GCP Partner Skills – Vertex AI / ADK / MCP / RAG (2026)
- Data Analysis – Hyper Island, Stockholm (2024 – present)
- B.Tech Computer Networks (2009)

Languages

Portuguese (native) / English (fluent) / Spanish (advanced) / Icelandic, Danish, Swedish (basic)
